Approximations to the Differential Equation P ,zt=V(x
Migration of Non
Wave Propagation on the Surface of a Sphere -- 1:337
Wave Theory Analysis of Statics Corrections -- 2:236
Wave) Sections -- lateral velocity -- *Schultz* 5:51
Wave Stacks -- *Schultz* 8:122
Wave Stacks -- slant -- *Schultz* 9:1
Wave Stacks -- slant field data -- *Estevez* 12:49
Wave Theory of Constant Offset Sections in Layered 16:25
Wave Theory Derivation of the Lateral Velocity 21:51
Wavefield from Slant Stacks -- *Thorson* 14:81
Wavefield -- *McMechan Ottolini* 20:25
Wavefield Extrapolation -- tutorial migration -- 20:179
Wavefield Continuation -- slant -- *Clayton*/ 25:115
Wavefield Continuation to the Inversion of Refraction 26:261
Wavefield Inversion Methods for Refraction and 27:0
Wavefield Continuation -- migration velocity -- 27:1
Wavefield Continuation -- field data -- *Clayton* 27:23
Wavefields -- migration -- *Clayton Yedlin* 25:59
Waveform Estimation -- deconvolution non Gaussian -- 7:167
Waveform Estimation -- multiples -- *Estevez* 8:202
Waveform Estimation -- deconvolution -- *Claerbout* 10:50
Waveform Estimation -- deconvolution -- *Estevez* 10:55
Waveform Estimation -- *Canales* 10:69
Waveform Ambiguity with Surface Reflection Coefficient 10:73
Waveform -- *Fulp* 11:147
waveform -- *Estevez* /Multiple Reflections 12:0
Waveform Estimation -- deconvolution slant field data 12:72
Waveform and Multiple Signatures -- *Morley* 16:233
Waveform Deconvolution -- time series -- *Godfrey* 17:26
Waves -- *Estevez* 1:8
Waves , Monochromatic Derivation -- multiples -- 7:30
Waves in Slanted Frames -- *Claerbout* 8:17
Waves -- slant -- *Claerbout* 8:38
Waves in Slanted Frames -- *Engquist* 8:96
Waves -- elastic -- *Engquist Clayton* 10:141
Waves -- *Claerbout Clayton* 10:165
Waves -- *Clayton Claerbout* 11:189
Waves -- slant -- *Claerbout* 15:57
Waves -- *Clayton* 16:281
Waves -- migration -- *Jacobs* 16:289
Waves -- slant -- *Gonzalez Serrano* 20:49
Waves in Laterally Varying by Wave Extrapolation -- 20:63
Waves in Rocks and Applications in Energy Exploration 23:0
Waves and Multiple Reflections -- tutorial slant -- 24:331
Waves by Wave Field Transformation -- slant -- 25:101
Waves -- math migration -- *Clayton* On The 27:81
Waves -- *Sword* 30:211
Waves in a Hexagonally Anisotropic Earth -- elastic -- 34:89
Weighted Burg-Levinson Recursion with Noise -- time 11:167
Weighting and Extrapolation Schemes for Stacking -- 30:77
Well Posedness of One Way Wave Equations -- migration 8:48
Well Log Deglitching and Seismogram Inversion -- time 17:57
Wide Offset Migration Equation -- *Claerbout* 2:56
Wide Angle Diffracted Multiple Reflections -- thesis 12:0
Wide Angle Variable Velocity One Way Wave Equation 24:1
Wide Angle Wave Equation Modeling -- migration -- 25:81
Wide Angle Migration Methods -- tutorial -- 25:209
Wide Offsets of Gathers -- missing data -- 28:321
Wiggins Type Algorithm -- time series non Gaussian -- 19:43
Window for Slant Stacking -- *Gray* 13:84
WKBJ Inversion Method for Acoustic Reflection Data -- 25:135
WKBJ Inverse for the Acoustic Wave Equation in a 25:167
Word Length -- computation -- *Engquist* 10:1
X Outer Migration -- computation -- *Dunbar* 2:127
X Outer Migration Example -- *Claerbout* 5:90
,xx+f(x ,z) -- *Engquist* /Approximations 7:133
X on Wave Migration Accuracy -- *Lynn* 8:70
,x ,z) space -- tutorial migration -- *Claerbout* 25:257
,z) -- *Jacobs* 28:145
Z Transforms -- time series deconvolution -- 20:243
,z)P ,xx+f(x ,z) -- *Engquist* /Order Difference 7:133
zero offset Sections -- *Hale* 30:29

You have entered a forest where lions and unicorns live. A lion lies on Mondays, Tuesdays, and Wednesdays. A unicorn lies on Thursdays, Fridays, and Saturdays. Two of them made the following statements:

Lion: Yesterday was one of my lying days.

Unicorn: Yesterday was one of my lying days too.

What day of the week is it?

##########

You have entered a forest where lions live. A lion lies on Mondays, Tuesdays, and Wednesdays. A lion made the following statements:

(1) I lied yesterday.

(2) I will lie again two days after tomorrow.

What day of the week is it?

##########

There were three caskets with the following inscriptions:

Gold: The portrait is in this casket.

Silver: The portrait is not in this casket.

Lead: The portrait is not in the gold casket.

If at most one of the inscriptions is true, where is the portrait?

##########

There were three caskets with the following inscriptions:

Gold: The portrait is not in the silver casket.

Silver: The portrait is not in this casket.

Lead: The portrait is in this casket.

At least one of the inscriptions is true and at least one of them is false. Where is the portrait?

##########

What is the maximum number of pieces of pancakes that can be produced by five straight line cuts? (No cuts parallel to the surface)

##########

If a knife weighs as much as two spoons, three spoons weigh as much as a knife and fork, a plate weighs as much as a knife and spoon, and a fork weighs four ounces, how much do the other utensils weigh?

##########
