

Cumulative Permuted Index of Authors in SEP Report Volumes 1 to 36

<i>Anderssen</i>	and Backward Solutions of the One Dimensional Wave Equation --	5:123
<i>Aral</i>	Plot Programs -- computation --	7:209
<i>Blozsom</i>	Crust, Hardeman County, Texas -- migration interpretation --	14:251
<i>Blozsom Kjartansson</i>	the 45 Degree Omega -- Finite Difference Algorithm -- field data --	15:21
<i>Blozsom Ottolini</i>	and the Finite Difference Migration Algorithms -- field data --	15:251
<i>Blozsom Gagnon Seeburger</i>	in Laterally Varying Media , Wind River Wyoming -- field data --	18:310
<i>Blozsom</i>	of Deep Crustal Seismic Reflection Data -- thesis field data --	22:0
<i>Blozsom</i>	on Migrated Sections as Imposed by Recording Geometry --	22:1
<i>Blozsom</i>	Geologic Interpretation of Migrated COCORP Hardeman County Texas --	22:17
<i>Blozsom</i>	Migration and Interpretation of the COCORP Wind River Wyoming --	22:77
<i>Bourbie Gonzalez Serrano</i>	Coefficients on Synthetic Seismograms: Theory -- elastic --	28:205
<i>Bourbie Gonzalez Serrano</i>	Coefficients on Synthetic Seismograms: Results -- elastic --	28:221
<i>Bourbie Gonzalez</i>	Synthetic Seismograms in Viscoelastic Media I Theory --	28:247
<i>Bourbie Gonzalez</i>	Synthetic Seismograms in Viscoelastic Media II Application --	28:283
<i>Brown</i>	Accuracy of Difference Approximations to the Migration Equation --	11:85
<i>Brown</i>	Boundary Conditions for Wave Equations -- migration --	11:103
<i>Brown</i>	for 15 Degree Equations with Variable Velocity -- migration --	13:33
<i>Brown</i>	Operators for the Variable Coefficient Case -- migration --	13:41
<i>Brown Clayton</i>	Approximations for Forward Modeling Problems -- migration --	13:90
<i>Brown</i>	Ray Tracing Effects of One Way Wave Equations -- migration --	14:119
<i>Brown</i>	Equations for Variable Velocity Media -- migration computation --	14:131
<i>Brown Clayton</i>	Phase Error Plots for Forward Modeling Schemes -- migration --	14:135
<i>Brown</i>	Causal Positive Real Operators -- attenuation --	15:203
<i>Brown</i>	to Three Dimensional Migration and Lateral Velocity Variation --	15:214
<i>Brown</i>	Laterally Varying by Wave Extrapolation -- elastic -- <i>Clayton</i>	20:83
<i>Brown</i>	Choice of Variables for Elastic Wave Extrapolation -- <i>Clayton</i>	20:73
<i>Brown</i>	Rules for Matrices: Another Look at Stability -- attenuation --	20:125
<i>Brune Claerbout</i>	Extrapolation of Magnetotelluric Fields -- electric --	1:189
<i>Brune</i>	Final Report on Magnetotelluric Field Extrapolation -- electric --	2:141
<i>Burg</i>	General Principles for Estimation of Covariance Matrices --	1:304
<i>Burg</i>	Concerning Maximum Entropy Spectral Estimation -- time series --	1:318
<i>Burg</i>	Forward and Backward Prediction Error Filters -- time series --	1:327
<i>Burg</i>	The General Variational Approach -- time series --	2:196
<i>Burg</i>	of the Two Dimensional Correlation Matrix -- time series --	2:205
<i>Burg</i>	Multichannel Maximum Entropy Spectral Analysis -- time series --	2:211
<i>Burg</i>	Two Dimensional Maximum Entropy Spectral Analysis -- time series --	2:217
<i>Burg</i>	a Two Dimensional Correlation Matrix (An Example) -- time series --	2:225
<i>Burg</i>	and Multichannel Maximum Entropy -- time series non Gaussian --	5:138
<i>Burg</i>	Maximum Entropy Spectral Analysis -- thesis --	8:0
<i>Burg</i>	for Single Channel Power Spectral Analysis -- time series --	8:1
<i>Burg</i>	Analysis from Autocorrelation Measurements -- time series --	8:6
<i>Burg</i>	Solution of the Variational Formulation -- time series --	8:8
<i>Burg</i>	Extending the Autocorrelation Function -- time series --	8:19
<i>Burg</i>	and the <i>Burg</i> Estimation Technique -- time series --	8:39
<i>Burg</i>	of the ($R(0)$, $C1$, $C2$, ...) Description -- time series --	8:55
<i>Burg</i>	Analysis from Autocorrelation Measurements -- time series --	8:68
<i>Burg</i>	The Entropy of a Multichannel Time Series --	8:69
<i>Burg</i>	of the Multichannel Variational Formulation -- time series --	8:73
<i>Burg</i>	the Multichannel Autocorrelation Function -- time series --	8:82
<i>Burg</i>	Appendix A -- Determination of Pure Line Spectra --	8:109
<i>Burg</i>	Appendix B -- Manipulations of the Multichannel Equations --	8:119
<i>Canales</i>	L1 Norm Spectral Estimation -- time series --	7:186
<i>Canales</i>	A Note on Waveform Estimation --	10:69
<i>Canales</i>	A Quantile Finding Program -- computation non Gaussian --	10:99
<i>Canales</i>	Mixed L1 and L2 Norm Problems -- non Gaussian --	10:114
<i>Cerveny</i>	Dynamic Ray Tracing in Two D Media --	28:21
<i>Cerveny</i>	Second Derivatives of Traveltime Field by Dynamic Ray Tracing --	28:31
<i>Cerveny</i>	Ray Tracing in a Vicinity of a Central Ray --	28:39
<i>Cerveny</i>	Computation of Geometrical Spreading by Dynamic Ray Tracing --	28:49
<i>Cerveny</i>	Dynamic Ray Tracing Across Curved Interfaces --	28:61
<i>Claerbout</i>	Dimensional Inhomogeneous Media Wave Calculations -- migration --	1:1

<i>Caerbout</i>	Two Techniques for Wave Equation Migration -- computation --	1:73
<i>Caerbout</i>	First Problem for Post Doc -- migration --	1:82
<i>Caerbout</i>	Noah's Method of Deconvolution by Flooding --	1:83
<i>Caerbout Riley</i>	Calculation of Diffracted Multiple Reflections -- computation --	1:100
<i>Caerbout</i>	Computing Diffracted Multiples -- <i>Riley</i>	1:106
<i>Caerbout</i>	Continuation of Shots and Receivers -- migration -- <i>Doherty</i>	1:136
<i>Caerbout</i>	Downward Continuation Equations -- migration -- <i>Doherty</i>	1:157
<i>Caerbout</i>	Velocity Analysis Based on the Wave Equation -- <i>Doherty</i>	1:180
<i>Caerbout</i>	Some Speculative Ideas on Velocity Estimation --	1:179
<i>Caerbout</i>	Extrapolation of Magnetotelluric Fields -- electric -- <i>Bruno</i>	1:189
<i>Caerbout</i>	Curve Fitting in Geophysical Inverse Problems --	1:256
<i>Caerbout Madden</i>	Impedance Estimation --	1:263
<i>Caerbout</i>	L1 Norm Program and Test Case -- non Gaussian computation --	1:272
<i>Caerbout</i>	Slant Frames --	1:279
<i>Caerbout</i>	Imaging with Refraction Seismograms -- slant --	1:283
<i>Caerbout</i>	Shifting Frames -- slant --	2:44
<i>Caerbout</i>	A Data Oriented Shifting Frame -- slant --	2:48
<i>Caerbout</i>	A Reversible Shifting Frame -- slant --	2:54
<i>Caerbout</i>	A Wide Offset Migration Equation --	2:56
<i>Caerbout</i>	The Emergent Angle Frame -- slant --	2:62
<i>Caerbout</i>	An Expanding Time Scale -- migration --	2:67
<i>Caerbout</i>	A Shot Offset Frame for Velocity Estimation --	2:73
<i>Caerbout</i>	Two Stratified Media Frames --	2:78
<i>Caerbout</i>	An Offset Squared Transformation -- frames --	2:82
<i>Caerbout</i>	An Explicit Scheme -- migration computation --	2:109
<i>Caerbout</i>	Explicit Scheme for the Wave Equation -- migration computation --	2:114
<i>Caerbout</i>	Last Two Chapters of Book --	2:265
<i>Caerbout</i>	Slant Stacks and Radial Traces -- multiples --	5:1
<i>Caerbout</i>	Slant Stacks & Diffracted Multiples --	5:13
<i>Caerbout</i>	X Outer Migration Example --	5:90
<i>Caerbout</i>	Viscosity Dip Filtering -- migration attenuation -- <i>Doherty</i>	5:102
<i>Caerbout</i>	for L1 Norm Algorithms for Seismic Decomposition -- time series --	5:134
<i>Caerbout</i>	Velocity Estimation Recapitulated -- tutorial --	5:220
<i>Caerbout</i>	Slanted Multiple Reflection Calculation --	7:1
<i>Caerbout</i>	Multiplets --	7:15
<i>Caerbout</i>	Coupled Slanted Waves , Monochromatic Derivation -- multiples --	7:30
<i>Caerbout</i>	Coupled Slanted Beams , Equations for Multiples Program --	7:33
<i>Caerbout</i>	Slant Midpoint Coordinates --	7:36
<i>Caerbout</i>	Slant Plane Wave Interpretation Coordinates --	7:89
<i>Caerbout</i>	Velocity Estimation with Slant Stacks , Part 1 --	7:94
<i>Caerbout</i>	Entropy Source Waveform Estimation -- deconvolution non Gaussian --	7:167
<i>Caerbout</i>	Spectral Balancing -- time series --	7:172
<i>Caerbout</i>	Migration in Media with Strong Lateral Velocity Variation --	8:1
<i>Caerbout</i>	Anisotropy Dispersion and Wave Migration Accuracy --	8:8
<i>Caerbout</i>	Three Dimensional Wave Migration --	8:15
<i>Caerbout</i>	A Brief Derivation of the Dix Theorem -- velocity --	8:16
<i>Caerbout</i>	Slanted Waves in Slanted Frames --	8:17
<i>Caerbout</i>	Expansion About Dipping Waves -- slant --	8:38
<i>Caerbout</i>	Frequency Dispersion and Wave Migration Accuracy --	8:62
<i>Caerbout</i>	Migration and RMS Velocity --	8:169
<i>Caerbout</i>	Velocity Independent Downward Continuation -- migration --	8:173
<i>Caerbout</i>	Absorptive Side Boundaries for Migration -- computation --	10:10
<i>Caerbout</i>	Refined Source Waveform Estimation -- deconvolution --	10:50
<i>Caerbout</i>	Ambiguity with Surface Reflection Coefficient -- deconvolution --	10:73
<i>Caerbout</i>	Non Gaussian Signal Analysis -- time series --	10:76
<i>Caerbout</i>	Solution of Overdetermined Convolution Equations -- time series --	10:84
<i>Caerbout</i>	Levinson Recursion Reprogrammed -- time series computation --	10:90
<i>Caerbout</i>	and Entropy of Seismic Data -- time series non Gaussian --	10:101
<i>Caerbout</i>	Function of One Half -- time series non Gaussian computation --	10:109
<i>Caerbout Clayton</i>	A Paraxial Equation for Elastic Waves --	10:165
<i>Caerbout</i>	Migration with Fourier Transforms --	11:3
<i>Caerbout</i>	How to Measure rms Velocity with a Pencil and a Straightedge --	11:41
<i>Caerbout Clayton</i>	The Stability of Absorbing Side Boundaries -- migration --	11:111
<i>Caerbout</i>	Weighted Burg-Levinson Recursion with Noise -- time series --	11:167
<i>Caerbout</i>	Dispersion Relations for Elastic Waves -- <i>Clayton</i>	11:189
<i>Caerbout</i>	Overthrust Imaging Coordinates -- migration --	11:195
<i>Caerbout</i>	Radiative Equilibrium in Acoustic Layered Media -- time series --	11:199
<i>Caerbout</i>	How to Transpose a Big Matrix -- computation --	11:211
<i>Caerbout</i>	The Switch to a Minicomputer -- computer --	11:237
<i>Caerbout</i>	Parsimonious Deconvolution -- time series non Gaussian --	13:1
<i>Caerbout</i>	of Parsimonious Deconvolution -- time series non Gaussian --	13:10
<i>Caerbout</i>	Seismic Imaging Concepts -- migration double square root --	14:1

<i>Caerbout</i>	Straightedge Determination of Interval Velocity --	14:13
<i>Caerbout Clayton</i>	Dip Correction of Velocity Estimates --	14:17
<i>Caerbout</i>	Migration in Slant Midpoint Coordinates -- double square root --	14:59
<i>Caerbout</i>	Continuing Constant Offset Sections a Paradox and Four Guesses --	14:65
<i>Caerbout Lynn</i>	Retarded Slant Midpoint Coordinates --	14:73
<i>Caerbout</i>	of Deconvolution: Spectrum Smoothing and Parsimony -- <i>Godfrey</i>	14:207
<i>Caerbout</i>	Deconvolution Estimators for Parsimonious Deconvolution --	14:227
<i>Caerbout</i>	The Real Problem with Using Array Processors -- <i>Newkirk</i>	14:285
<i>Caerbout</i>	Snell Waves -- slant --	15:57
<i>Caerbout</i>	The Double Square Root Equation -- migration --	15:73
<i>Caerbout</i>	Short Review of Retarded Snell Midpoint Coordinates -- slant --	15:81
<i>Caerbout</i>	Velocity Analysis: Equations for Programs -- double square root --	15:89
<i>Caerbout</i>	Minimum Information Deconvolution -- time series non Gaussian --	15:109
<i>Caerbout</i>	Deconvolved Time Sections -- time series field data -- <i>Morley</i>	15:191
<i>Caerbout</i>	Exact Factorization of the Elastic Wave Equation -- <i>Clayton</i>	15:233
<i>Caerbout Yilmaz</i>	of the Double Square Root Equation -- prestack migration --	16:5
<i>Caerbout Yilmaz</i>	Operator -- double square root prestack migration -- <i>Yilmaz</i>	16:13
<i>Caerbout Yilmaz</i>	Off the Sides of a Common Midpoint Gather -- migration --	16:57
<i>Caerbout</i>	Stable Extrapolation -- migration -- <i>Godfrey Muir</i>	16:83
<i>Caerbout Kjartansson</i>	Powers of Causal Operators -- attenuation --	16:131
<i>Caerbout</i>	Reflectance and Transference Functions -- migration attenuation --	16:141
<i>Caerbout</i>	of Wave Extrapolators -- A Review -- tutorial migration --	16:353
<i>Caerbout</i>	Sign Convention in Fourier Transform -- tutorial --	16:361
<i>Caerbout</i>	Equation Multiple Suppression: Correspondence with Time Series --	20:57
<i>Caerbout</i>	Step Size in Optimization Problems -- computation --	20:121
<i>Caerbout</i>	Root Recurrence for Causal Branch Cut Functions -- attenuation --	20:155
<i>Caerbout</i>	Introduction to Wavefield Extrapolation -- tutorial migration --	20:179
<i>Caerbout</i>	Anisotropy Dispersion and Wave Migration Accuracy --	20:207
<i>Caerbout</i>	The Purification of Binary Mixtures -- non Gaussian --	20:221
<i>Caerbout Hale</i>	Recursive Dip Filters --	20:235
<i>Caerbout</i>	Seven Essays on Minimum Entropy -- time series non Gaussian --	24:157
<i>Caerbout</i>	Table of Contents -- tutorial --	24:262
<i>Caerbout</i>	Finite Differencing -- tutorial migration --	24:265
<i>Caerbout</i>	Introduction to Stability -- tutorial migration --	24:273
<i>Caerbout</i>	Relation Derivation of Wave Extrapolators -- tutorial migration --	24:278
<i>Caerbout</i>	Difficulty of Higher Dimensions -- tutorial migration --	24:287
<i>Caerbout</i>	Splitting and Full Separation -- tutorial migration --	24:290
<i>Caerbout</i>	Dispersion and Wave Migration Accuracy -- tutorial migration --	24:299
<i>Caerbout</i>	Impedance and Wave Field Extrapolators -- tutorial migration --	24:310
<i>Caerbout</i>	Snell Waves and Multiple Reflections -- tutorial slant --	24:331
<i>Caerbout</i>	Time Series and One Dimensional Multiple Reflection -- tutorial --	24:343
<i>Caerbout</i>	Slanted Ray Multiple Reflections -- tutorial --	24:349
<i>Caerbout</i>	Wave Equations for Snell Wave Multiples -- tutorial slant --	24:360
<i>Caerbout</i>	Restoration of Missing Data by Least Squares Optimization --	25:1
<i>Caerbout</i>	, Interpolation , and Smoothing of Wave Fields -- missing data --	25:17
<i>Caerbout</i>	Parsimonious Models -- missing data time series non Gaussian --	25:23
<i>Caerbout</i>	Exploding Reflectors -- migration tutorial --	25:191
<i>Caerbout</i>	Extrapolation as a Two Dimensional Filter -- migration tutorial --	25:203
<i>Caerbout</i>	Four Wide Angle Migration Methods -- tutorial --	25:209
<i>Caerbout</i>	The Physical Basis -- tutorial migration --	25:221
<i>Caerbout</i>	The Single Square Root Equation -- tutorial migration --	25:231
<i>Caerbout</i>	of Two Dimensional Fourier Techniques -- tutorial computation --	25:239
<i>Caerbout</i>	Why Use Finite Differencing? -- tutorial migration --	25:245
<i>Caerbout</i>	Retarded Coordinates -- tutorial migration --	25:251
<i>Caerbout</i>	Finite Differencing in (t , x , z) space -- tutorial migration --	25:257
<i>Caerbout</i>	Migration , Dependence on Velocity -- tutorial --	25:265
<i>Caerbout</i>	Aspects of the 45 Degree Equation -- tutorial computation --	25:271
<i>Caerbout</i>	Absorbing Sides -- tutorial migration --	25:277
<i>Caerbout</i>	Offset , Another Dimension -- tutorial migration --	25:285
<i>Caerbout</i>	Cheop's Pyramid -- tutorial migration --	25:289
<i>Caerbout</i>	of the Double Square Root Equation -- tutorial migration --	25:299
<i>Caerbout</i>	Meaning of the Double Square Root Equation -- tutorial migration --	25:307
<i>Caerbout</i>	Stacking and Velocity Analysis -- tutorial --	25:317
<i>Caerbout</i>	Offset Together -- double square root slant tutorial migration --	25:333
<i>Caerbout</i>	The Up Down Imaging Concept -- tutorial migration --	25:349
<i>Caerbout</i>	Shallow Multiples -- tutorial --	25:353
<i>Caerbout</i>	Missing Data: Wanted , Good Convergence in a Few Steps --	26:23
<i>Caerbout</i>	Program for One Dimensional Missing Data Studies --	26:39
<i>Caerbout Thorson</i>	Missing Data in Midpoint Space: An Intuitive Approach --	26:63
<i>Caerbout</i>	Brief Notes on the Detection of Frequency Dispersion --	26:67
<i>Caerbout</i>	Display Gain -- graphics --	26:75
<i>Caerbout</i>	with V(z) to Hyperbolas -- velocity -- <i>Conzalez Serrano</i>	26:137

<i>Claerbout</i>	On Line Movies -- graphics --	28:1
<i>Claerbout</i>	Simplest Gaussian Beam -- ray tracing --	28:93
<i>Claerbout</i>	Gaussian Beam in Energy Variables -- ray tracing --	28:99
<i>Claerbout</i>	Continuation of Moveout Corrected Radial Traces -- migration --	30:1
<i>Claerbout</i>	Envelope Sensing Decon --	30:121
<i>Claerbout</i>	Imperfectly Separable Models --	30:159
<i>Claerbout</i>	Linear Velocity Spectrum -- <i>Gonzalez</i>	30:169
<i>Claerbout</i>	Throw Away Your Paper Sections -- graphics -- <i>Jacobs</i>	30:207
<i>Claerbout</i>	Imaging the Earth's Interior Chapters One to Four -- tutorial --	30:233
<i>Claerbout et al</i>	Signal Noise Decomposition --	32:37
<i>Claerbout</i>	Butterworth Dip Filters -- <i>Hale</i>	32:47
<i>Claerbout</i>	Chapter Five Imaging the Earths Interior -- tutorial --	32:211
<i>Claerbout</i>	Ground Roll and Radial Traces --	35:43
<i>Claerbout</i>	Missing Data Analytic Solutions --	35:55
<i>Claerbout</i>	Separation of Non Stationary Signals and Noises -- time series --	35:57
<i>Claerbout</i>	Accelerating Convergence in the Missing Data Iteration --	35:59
<i>Claerbout Rocca</i>	Extracting Velocities from Difractions -- <i>Harlan</i>	35:107
<i>Claerbout</i>	Proof that Every Causal Positive Real Function is an Impedance --	35:185
<i>Claerbout</i>	4.5 Stretching Tricks -- migration tutorial --	35:191
<i>Claerbout</i>	Deformation Transformation -- missing data --	35:225
<i>Claerbout</i>	Program for Radial Trace Studies -- computation missing data --	35:229
<i>Claerbout</i>	Chapter 3: Offset Another Dimension -- tutorial --	35:261
<i>Clayton</i>	Absorptive Side Boundaries for Migration -- computation --	10:18
<i>Clayton</i>	Approximations of One Way Waves -- elastic -- <i>Engquist</i>	10:141
<i>Clayton</i>	A Paraxial Equation for Elastic Waves -- <i>Claerbout</i>	10:165
<i>Clayton</i>	Absorbing Side Boundaries -- migration -- <i>Claerbout</i>	11:111
<i>Clayton Engquist</i>	Absorbing Boundary Conditions -- migration --	11:116
<i>Clayton</i>	Refracted Body Wave Amplitudes --	11:173
<i>Clayton Claerbout</i>	Dispersion Relations for Elastic Waves --	11:189
<i>Clayton</i>	for Forward Modeling Problems -- migration -- <i>Brown</i>	13:90
<i>Clayton</i>	Dip Correction of Velocity Estimates -- <i>Claerbout</i>	14:17
<i>Clayton</i>	Common Midpoint Migration -- double square root --	14:21
<i>Clayton</i>	Plots for Forward Modeling Schemes -- migration -- <i>Brown</i>	14:135
<i>Clayton Claerbout</i>	An Exact Factorization of the Elastic Wave Equation --	15:233
<i>Clayton</i>	Fourier Transforms without Transposing -- computation --	15:247
<i>Clayton</i>	A Scalar Migration Equation for Converted Shear Waves --	16:281
<i>Clayton Brown</i>	Love Waves in Laterally Varying by Wave Extrapolation -- elastic --	20:63
<i>Clayton Brown</i>	The Choice of Variables for Elastic Wave Extrapolation --	20:73
<i>Clayton</i>	Square Root Equation in Midpoint Offset Coordinates -- migration --	20:201
<i>Clayton McMechan</i>	Data by Wave Field Migration -- slant double square root --	24:33
<i>Clayton Stolt</i>	An Inversion Method for Acoustic Wave Fields --	24:57
<i>Clayton</i>	An Inversion Method for Elastic Wave Fields --	24:81
<i>Clayton Yedlin</i>	F K Migration of Multi Offset Vertical Seismic Profiles --	24:93
<i>Clayton</i>	to Point Sources in Two Dimensions -- migration -- <i>Stolt</i>	24:255
<i>Clayton Yedlin</i>	Stable Extrapolation of Scalar Wavefields -- migration --	25:59
<i>Clayton McMechan</i>	Free Surface Multiples by Wavefield Continuation -- slant --	25:115
<i>Clayton Stolt</i>	A Born WKB Inversion Method for Acoustic Reflection Data --	25:135
<i>Clayton Mooney</i>	of Refraction Data -- velocity migration -- <i>McMechan</i>	26:281
<i>Clayton</i>	Continuation of Slant Stacks -- velocity migration computation --	26:281
<i>Clayton</i>	Refraction and Reflection Data -- thesis elastic born variables --	27:0
<i>Clayton</i>	Refracted Data By Wavefield Continuation -- migration velocity --	27:1
<i>Clayton</i>	Of Refraction Data By Wavefield Continuation -- field data --	27:23
<i>Clayton</i>	A Born-WKB Inversion Method For Acoustic Reflection Data --	27:35
<i>Clayton</i>	A Born Inversion Method For Elastic Wave Fields --	27:57
<i>Clayton</i>	Extrapolation Operators In An Acoustic Medium -- migration --	27:67
<i>Clayton</i>	For The Extrapolation Of Elastic Waves -- math migration --	27:81
<i>Courtillet</i>	Vertical Derivative Operators in Potential Problems -- electric --	2:160
<i>Courtillet</i>	Surveying: Trying to Pose the Problem -- electric migration --	2:188
<i>Deregowski Rocca</i>	Offset Sections in Layered Media -- double square root migration --	16:25
<i>Deregowski</i>	for Computing Interval Velocities from Common Midpoint Gathers --	16:205
<i>Doherty Claerbout</i>	Downward Continuation of Shots and Receivers -- migration --	1:136
<i>Doherty</i>	Transformations and Migration Equations --	1:141
<i>Doherty Claerbout</i>	of Various Downward Continuation Equations -- migration --	1:157
<i>Doherty Claerbout</i>	Velocity Analysis Based on the Wave Equation --	1:160
<i>Doherty</i>	Migration as a Tool in Velocity Estimation --	2:2
<i>Doherty</i>	Migration of Common Offset Sections --	2:8
<i>Doherty</i>	Continuation of Multi Offset Sections and Velocity Estimation --	2:17
<i>Doherty</i>	The Emergent Angle Frame for Sections -- slant --	2:69
<i>Doherty</i>	Independent Seismic Velocity Estimation -- thesis field data --	4:0
<i>Doherty Claerbout</i>	Numerical Viscosity Dip Filtering -- migration attenuation --	5:102
<i>Dunbar</i>	The Balanced Two Way Merge Algorithm -- migration computation --	2:101
<i>Dunbar</i>	X Outer Migration -- computation --	2:127

<i>Dunbar</i>	Filter for Magnetic Profiles -- electric time series computation --	2:184
<i>Dunbar</i>	and Approximate Solutions for the Wave Equation -- numeric --	5:110
<i>Dut</i>	Subjective Comparison of Migration Methods --	15:273
<i>Dut</i>	A New Proposal -- migration --	35:223
<i>Engquist</i>	to the Differential Equation $P_z z = V(x, z)P_{xx} + f(x, z)$ --	7:133
<i>Engquist</i>	Well Posedness of One Way Wave Equations -- migration --	8:48
<i>Engquist</i>	Difference Approximation of Waves in Slanted Frames --	8:96
<i>Engquist</i>	Some Numerical Aspects of Stacking -- slant --	8:149
<i>Engquist</i>	Migration with Short Computer Word Length -- computation --	10:1
<i>Engquist</i>	Absorbing Boundary Conditions for Wave Equations -- migration --	10:30
<i>Engquist</i>	One Way Elastic Wave Equations --	10:125
<i>Engquist Clayton</i>	Difference Approximations of One Way Waves -- elastic --	10:141
<i>Engquist</i>	Absorbing Boundary Conditions -- migration -- <i>Clayton</i>	11:116
<i>Engquist</i>	Variable Velocity: Wave Extrapolation and Reflection --	13:109
<i>Estevez</i>	A Tutorial on Monochromatic Waves --	1:8
<i>Estevez Schultz</i>	Dispersion Relationship for the Slant Frames Approximation --	1:287
<i>Estevez</i>	Slanted Beam Coupling --	2:38
<i>Estevez</i>	for An Emergent Angle Frame in Stratified Media -- slant --	2:85
<i>Estevez</i>	Preliminary One Dimensional Slant Synthetics -- multiples --	5:16
<i>Estevez</i>	Slant Frames in Layered Media -- multiples --	5:20
<i>Estevez</i>	Equation Coefficients for a Shot Offset Frame in Layered Media --	5:95
<i>Estevez</i>	Shot Waveform Estimation -- multiples --	8:202
<i>Estevez</i>	One Dimensional Examples of Slant Synthetics -- multiples --	8:222
<i>Estevez</i>	Results on Refined Source Waveform Estimation -- deconvolution --	10:55
<i>Estevez</i>	Predicting Multiple Reflection Arrivals on Slant Stacks --	11:77
<i>Estevez Fulp</i>	A Look at Direct Arrivals --	11:133
<i>Estevez</i>	Slant Stacks and Intervals of Optimum Stacking --	11:157
<i>Estevez</i>	-- thesis slant field data deconvolution source waveform --	12:0
<i>Estevez</i>	A Ray Approximation Theory for Multiple Modeling and Suppression --	12:8
<i>Estevez</i>	The Wave Equation Approach to Multiples Modeling and Suppression --	12:30
<i>Estevez</i>	Wave Stacks -- slant field data --	12:49
<i>Estevez</i>	Source Waveform Estimation -- deconvolution slant field data --	12:72
<i>Friedlander</i>	The "Star Product" in a Wave Propagation Model -- computation --	7:194
<i>Friedlander</i>	Downward Continuation of Operators -- migration multiple --	7:200
<i>Fulp</i>	A Look at Direct Arrivals -- <i>Estevez</i>	11:133
<i>Fulp</i>	Relating the Direct Arrival to the Shot Waveform --	11:147
<i>Funkhouser</i>	A Wave Propagation on the Surface of a Sphere -- computation --	1:337
<i>Gagnon Seeburger</i>	Varying Media, Wind River Wyoming -- field data -- <i>Blossom</i>	16:310
<i>Godfrey Claerbout</i>	Two Methods of Deconvolution: Spectrum Smoothing and Parsimony --	14:207
<i>Godfrey</i>	Theory Approach to Deconvolution -- time series non Gaussian --	15:157
<i>Godfrey Muir Claerbout</i>	Stable Extrapolation -- migration --	16:83
<i>Godfrey Muir et al</i>	the Code for the 45 degree Equation -- migration -- <i>Jacobs</i>	16:89
<i>Godfrey Jacobs</i>	A Program for Stable Migration -- computation --	16:97
<i>Godfrey Muir Rocca</i>	by Markov Chains -- Model Properties -- time series non Gaussian --	16:245
<i>Godfrey Muir</i>	Bussgang Properties -- time series non Gaussian -- <i>Rocca</i>	16:275
<i>Godfrey</i>	Model for Seismogram Analysis -- thesis time series non Gaussian --	17:0
<i>Godfrey</i>	Seismic Impedance with Markov Chains -- time series non Gaussian --	17:1
<i>Godfrey</i>	for Iterative Source Waveform Deconvolution -- time series --	17:26
<i>Godfrey</i>	Well Log Deglitching and Seismogram Inversion -- time series --	17:57
<i>Godfrey</i>	The Minimum Mean Square Error Estimator -- time series --	17:74
<i>Godfrey</i>	Properties of the Conditional Mean -- time series --	17:76
