
STANFORD EXPLORATION PROJECT

Report Number 37

September 1983

By: R. Burridge, J. Claerbout, P. Fowler, W. Harlan, S. Levin,
R. Ottolini, J. Ronen, D. Rothman, C. Sword, J. Toldi and R. Ullmann

SEP-37 --- TABLE OF CONTENTS

Tomography

Harlan, W., and Burridge, R., A tomographic velocity inversion for unstacked data 1

Toldi, J., The linear stacking slowness operator for a non-zero near offset.....9

Toldi, J., The linear stacking slowness method for a field dataset.....17

Migration after stack

Levin, S.,, Avoiding artifacts in phase shift migration 27

Levin, S.,, Principle of reverse time migration 37

Levin, S., and Rothman, D., Residual migration: two approaches 43

Rothman, D., Residual migration after migration with non-constant velocity 53

Migration before stack

Ottolini, R., Velocity independent seismic imaging 59

Ronen, J., CDP dispersal observed.....69

Ronen, J., DMO applied.....81

Ronen, J., Pre-stack partial migration with post stack full migration programs.....91

Claerbout, J., 3.6 Migration with velocity estimation.....95

Vertical seismic profiling

Fowler, P., Head wave identification in an offset vertical seismic profile 109

Signal noise separation

Harlan, W., Signal/noise separation and velocity estimation 121

Ottolini, R., Signal/noise separation in dip space 143

Probability and statistics

Rothman, D., Probabilistic residual statics.....151

Claerbout, J., Jensen inequality: modeling envelopes and spectra 157

Computer science

Ullmann, R., Design of a geophysical programming language 163

Ottolini, R., and Sword, C., TeX: A portable typesetting language 179

Ottolini, R., Generic expert systems 181

Ottolini, R., and Claerbout, J.F. The SEP bibliography of published papers arranged by subject 187

Research personnel 191

SEP phone directory 194

Sponsors of the SEP, 1982-83 195
