RSS

Personally, I'm wishing for some Youtube organizer software resembling reader software (RSS), for example, **Feedly** or **The Old Reader**. These deliver you from your chosen sources an ever-current list of the articles that you've not yet seen. Find [RSS feeders on the web](#) or at your App Store. I see about 150 headlines a day. One-click brings me a bit deeper, a second click brings me to the source. (I'm often lucky and find the middle stage includes the entire article without the advertisements.)
