RESEARCH PERSONNEL

David Brown has studied at Stanford since 1972, majoring in physics and geophysics in the "coterminal" degree program. He will receive his B.S. in physics and M.S. in geophysics in June 1977. He has been with SEP since January 1977, and has worked on higher-accuracy difference approximations. After graduation from Stanford he will continue to work with SEP until September, when he will begin his Ph.D. work in numerical analysis at Uppsala University, Sweden.

Jon F. Claerbout received his education at M.I.T. (B.S. physics 1960, M.S. geophysics 1963, Ph.D. geophysics 1967). He worked for Teledyne, Inc., in 1963, and studied in Uppsala, Sweden, in 1964. He joined the geophysical faculty at Stanford University in 1967. From 1967 to 1973, he was a consultant to the Chevron Oil Field Research Company. He is an active member of the Society of Exploration Geophysics, receiving the Best Presentation Award for a paper, "Extrapolation of Wave Fields," presented at the 1972 international SEG meeting, and receiving the Society's Medal Award in 1973 "in recognition of his outstanding and original pioneering work in seismic wave analysis." During the year 1972-73 he was a visiting research geologist at Princeton University and a visiting lecturer at Sydney University. Presently he is professor of geophysics at Stanford University.

Robert W. Clayton received a B.A. degree in engineering science from the University of Toronto in 1973, and a M.S. degree from the University of British Columbia in 1975. His M.S. thesis was on the deconvolution of suites of teleseismic earthquake recordings. He is currently a Ph.D. candidate in the department of geophysics at Stanford University.

Giovanni Da Prat received a degree in physics (Licenciado) from the Central University of Venezuela in 1974. From 1974 to 1975, he taught physics at the Simon Bolivar University in Caracas, Venezuela. Presently, he is a graduate student in geophysics at Stanford University. He is a member of SEG.

Björn Engquist received his B.S. and Ph.D. (in numerical analysis) from Uppsala University, Sweden. From 1966 to 1967 he worked as an assistant in the department of mathematics, and from 1967 to 1969 in the department of computer sciences. He was a Research Assistant at Courant Institute of Mathematical Sciences, New York University, 1969-70, and taught a course in numerical analysis at UC-Berkeley, 1970. From 1970 until 1975 he was employed as a Research Assistant in the department of computer sciences, Uppsala University, and returned to Uppsala upon leaving SEP in 1976.

Raul Estevez, native of Venezuela, received a degree in physics (Licenciado) from Friendship University of Moscow in 1965. From 1965 to 1967, he taught physics at the Central University of Venezuela, and from 1967 to 1971, at the University of Los Andes, in Merida, Venezuela. Presently, he is a graduate student at Stanford University, working toward a Ph.D. in geophysics.

Terrance J. Fulp received a B.S. degree in geophysics from the University of Tulsa in 1975. He is currently a graduate student at Stanford in geophysics. During the Summers of 1974 and 1975, he was employed by Texaco, Inc., interpreting reflection seismograms and modeling gravity data. He is a member of SEG and AGU.

Walter S. Lynn received a B.A. degree in geology and geophysics from Princeton University in 1973, and a M.S. degree in geophysics from Oregon State University in 1975. His undergraduate and M.S. thesis research was on velocity inhomogeneities in the lower mantle and on the tectonic evolution of the northern Cocos plate, respectively. He is currently a Ph.D. candidate in the geophysics department at Stanford University, and is a member of SEG, AGU, and AAPG.

Sunil Mehta received a B.S. in Ocean Engineering from Florida Atlantic University in 1975, and an M.S. in geophysics from Stanford University. He worked at Woods Hole Oceanographic Institute in the geophysics department for one and a half years. He is currently a Ph.D. candidate at Stanford University.

Dag Tjøstheim graduated in 1969 from the University of Bergen, Norway, in applied mathematics. He worked 1970-71 at the University of Bergen Computing Center at a research project sponsored by the Norwegian Navy. He graduated in 1974 from Princeton University with a Ph.D. in applied mathematics (department of electrical engineering). Since 1974, he has been a Research Scientist at NORSAR (Norwegian Seismic Array). From August 1976 to March 1977, he was a visitor at Stanford University, department of statistics (SIMS air pollution project) and the department of geophysics (SEP). He has taught courses in statistics and mathematics at the Universities of Oslo and Bergen and at Stanford University.

OUTLINE/INDEX

Jon F. Claerbout

I tried to make an outline of the SEP reports. There were many cross links that required multiple entries. The result resembles an index with the following headings:

Background
Best of Burg
Elastic Waves
L_1-Norm and Non-Gaussian Modelling
Miscellaneous
Migration
Multiple Reflection
Source Waveforms
Slanted Coordinates
Time Series Analysis
Velocity Estimation

In the index, report numbers are in italics, page numbers are in arabic numbers; the authors' names are in capitals.

BACKGROUND

CLAERBOUT, 2-D Inhomogeneous Media Wave Calculations *1*, 1

ESTEVEZ, A Tutorial on Monochromatic Waves *1*, 8

SCHULTZ, Approximations to the Wave Propagation Transfer Function *1*, 41

RILEY, A Benchmark Program for Migration/Diffraction *1*, 60

CLAERBOUT, Two Techniques for Wave Equation Migration *1*, 73

FUNKHOUSER, Wave Propagation on the Surface of a Sphere *1*,337

CLAERBOUT, SEP Synopsis and Prognosis *11*, 1

BEST OF BURG

Maximum Entropy Spectral Analysis (dissertation) *6*

General Principles for Estimation of Covariance Matrices *1*, 304

Recommendations Concerning Maximum Entropy Spectral Estimation ... *1*, 318

An Algorithm for Obtaining the Correlation Functions Between Forward and Backward Prediction Error Filters *1*, 327

The General Variational Approach *2*, 196

An Example in Which Consistency is Equivalent to Positve Definiteness of the 2-D Correlation Matrix *2*, 205

Multichannel Maximum Entropy Spectral Analysis *2*, 211

Two-Dimensional Maximum Entropy Spectral Analysis *2*, 217

Estimation of a Two-Dimensional Correlation Matrix (An Example) .. *2*, 225

Single and Multichannel Maximum Entropy *5*, 138

CLAERBOUT, Radiative Equilibrium in Acoustic Layered Media *11*, 199

ELASTIC WAVES

ENGQUIST, One Way Elastic Wave Equations *10*, 125

ENGQUIST and CLAYTON, Difference Approximations of One Way Waves *10*, 141

CLAERBOUT and CLAYTON, A Paraxial Equation for Elastic Waves *10*, 165

CLAYTON and ENGQUIST, Absorbing Boundary Conditions *11*, 116

CLAYTON and CLAERBOUT, Dispersion Relations for Elastic Waves ... *11*, 189

L_1-NORM AND NON-GAUSSIAN MODELLING

CLAERBOUT, L_1 Norm Program and Test Case *1*, 272

CLAERBOUT, The Need for L_1 Norm Algorithms for Seismic Decomposition *5*, 134

CANALES, L_1 Norm Spectral Estimation *7*, 186

CANALES, Mixed L_1 and L_2 Norm Problems *10*, 114

CLAERBOUT, Non-Gaussian Signal Analysis *10*, 76

CLAERBOUT, Exponential Tilt Invariant Solution of Overdetermined Convolution Equations *10*, 84

CLAERBOUT, LEVITY: Levinson Recursion Reprogrammed *10*, 90

CANALES, A Quantile Finding Program *10*, 99

CLAERBOUT, Probability and Entropy of Seismic Data *10*, 101

CLAERBOUT, IIB: Inverse Incomplete Beta Function of One-Half ... *10*, 109

MEHTA, Equalizing Gain on Seismic Sections by Quantiles *11*, 205

MISCELLANEOUS

MADDEN, Conductivity of Porosity Relationship in Rocks *1*, 229

NUR *et al.*, Seismic Velocities in Porous and Fissured Rocks *2*, 26

SCHULTZ, A Proposal for Wave Theory Analysis of Statics Corrections .. *2*, 236

CLAERBOUT, Curve Fitting in Geophysical Inverse Problems *1*, 256

CLAERBOUT and MADDEN, Impedance Estimation *1*, 263

FRIEDLANDER, The "Star Product" in a Wave Propagation Model *7*, 194

FRIEDLANDER, Downward Continuation of Operators *7*, 200

BRUNE and CLAERBOUT, Extrapolation of Magnetotelluric Fields *1*, 189

BRUNE, Final Report on Magnetotelluric Field Extrapolation *2*, 141

COURTILLOT, Different Approximations to Vertical Derivative Operators in Potential Problems *2*, 160

COURTILLOT, The Downward Continuation of Sources and Receivers in Resistivity Surveying: Trying to Pose the Problem *2*, 166

DUNBAR, Terrain Noise Suppression Filter for Magnetic Profiles *2*, 184

ANDERSSEN, Separation of the Forward and Backward Solutions of the One-Dimensional Wave Equation *5*, 123

DUNBAR, Variational Principles and Approximate Solutions for the Wave Equation *5*, 110

RILEY, Description of Plot Tapes *1*, 369

ARAL, Plot Programs *7*, 209

KHANNA, Plot Programs *7*, 216

CLAERBOUT, The Switch to a Minicomputer *11*, 237

MIGRATION

ESTEVEZ, Migration Equation Coefficients for an Emergent Angle Frame in Stratified Media *2*, 85

CLAERBOUT, A Wide Offset Migration Equation *2*, 56

DUNBAR, The Balanced Two Way Merge Algorithm *2*, 101

CLAERBOUT, An Explicit Scheme *2*, 109

STARIUS, An Explicit Scheme for the Equation $Q_{ttz} - c^2x\ Q_{xxz} = c(\beta - \alpha\gamma)Q_{xxt}$ *2*, 114

DUNBAR, X-Outer Migration *2*, 127

SCHULTZ, A Fast and Accurate Shifting Scheme *5*, 79

CLAERBOUT, X-Outer Migration Example *5*, 90

ESTEVEZ, Migration Equation Coefficients for a Shot-Offset Frame in Layered Media *5*, 95

DOHERTY and CLAERBOUT, Numerical Viscosity-Dip Filtering *5*, 102

CLAERBOUT, First Problem for Post-Doc *1*, 82

CLAERBOUT, Slanted Waves in Slanted Frames *8*, 17

CLAERBOUT, Expansion about Dipping Waves *8*, 38

ENGQUIST, Well-Posedness of One-Way Wave Equations *8*, 48

CLAERBOUT, Frequency Dispersion and Wave Migration Accuracy *8*, 62

LYNN, The Effect of Discrete Δx on Wave Migration Accuracy *8*, 70

ENGQUIST, Difference Approximation of Waves in Slanted Frames *8*, 96

ENGQUIST, High Order Difference Approximations to the Differential Equation $P_{tz} = [v(x,z)/2]P_{xx} + f(x,z)$ *7*, 133

CLAERBOUT, Migration in Media with Strong Lateral Velocity Variation *8*, 1

CLAERBOUT, Anisotropy Dispersion and Wave Migration Accuracy *8*, 8

CLAERBOUT, 3-D Wave Migration *8*, 15

ENGQUIST, Migration with Short Computer Word Length *10*, 1

CLAERBOUT, Absorptive Side Boundaries for Migration *10*, 10

CLAYTON, Programming Absorptive Side Boundaries for Migration *10*, 16

ENGQUIST, Absorbing Boundary Conditions for Wave Equations *10*, 30

BROWN, Inhomogeneous Boundary Conditions for Wave Equations *11*, 103

CLAERBOUT and CLAYTON, The Stability of Absorbing Side Boundaries.. *11*, 111

CLAYTON and ENGQUIST, Absorbing Boundary Conditions *11*, 116

BROWN, Improving the Accuracy of Difference Approximations to the Migration Equation *11*, 85

CLAERBOUT, How to Transpose a Big Matrix *11*, 211

Migration (continued)

CLAERBOUT, Migration with Fourier Transforms *11*, 3
LYNN, Solution *11*, 6
LYNN, Implementing f-k Migration and Diffraction *11*, 9
DA PRAT and LYNN, Migration Examples Using Fourier Transforms *11*, 29

MULTIPLE REFLECTION

RILEY, Wave Equation Synthesis and Inversions of Diffracted Multiple Seismic Reflections (Dissertation) *3*
CLAERBOUT, Noah's Method of Deconvolution by Flooding *1*, 83
RILEY, One Dimensional Noah's Deconvolution *1*, 89
CLAERBOUT and RILEY, Calculation of Diffracted Multiple Reflections ... *1*, 100
RILEY and CLAERBOUT, Computing Diffracted Multiples *1*, 106
RILEY, Preliminary Results on Diffracted Multiple Modelling and Removal *1*, 126
RILEY, Computer Program for Diffracted Multiple Reflections *2*, 240
CLAERBOUT, Slant Stacks and Radial Traces *5*, 1
CLAERBOUT, Slant Stacks and Diffracted Multiples *5*, 13
ESTEVEZ, Preliminary 1-D Slant Synthetics *5*, 16
ESTEVEZ, Slant Frames in Layered Media *5*, 20
CLAERBOUT, Slanted Multiple Reflection Calculation *7*, 1
CLAERBOUT, Multiplets *7*, 15
CLAERBOUT, Coupled Slanted Waves, Monochromatic Derivation *7*, 30
CLAERBOUT, Coupled Slanted Beams, Equations for Multiples Program *7*, 33
CLAERBOUT, Slant Midpoint Coordinates *7*, 36
KHANNA, Slant Multiple Reflections *7*, 43
FRIEDLANDER, The "Star Product" in a Wave Propagation Model *7*, 194
FRIEDLANDER, Downward Continuation of Operators *7*, 200
ESTEVEZ, 1-D Examples of Slant Synthetics *8*, 222
ESTEVEZ, Predicting Multiple Reflection Arrivals on Slant Stacks *11*, 77

SLANTED COORDINATES

CLAERBOUT, Slant Frames *1*, 279

CLAERBOUT, Imaging with Refraction Seismograms *1*, 283

ESTEVEZ and SCHULTZ, Dispersion Relationship for the Slant Frames Approximation *1*, 287

ESTEVEZ, Slanted Beam Coupling *2*, 38

CLAERBOUT, Shifting Frames *2*, 44

CLAERBOUT, A Data Oriented Shifting Frame *2*, 48

CLAERBOUT, A Reversible Shifting Frame *2*, 54

CLAERBOUT, A Wide Offset Migration Equation *2*, 56

CLAERBOUT, The Emergent Angle Frame *2*, 62

CLAERBOUT, An Expanding Time Scale *2*, 67

DOHERTY, The Emergent Angle Frame for Sections *2*, 69

CLAERBOUT, A Shot Offset Frame for Velocity Estimation *2*, 73

CLAERBOUT, Two Stratified Media Frames *2*, 78

CLAERBOUT, An Offset Squared Transformation *2*, 82

CLAERBOUT, Slant Stacks and Radial Traces *4*, 1

CLAERBOUT, Slant Stacks and Diffracted Multiples *4*, 13

ESTEVEZ, Preliminary 1-D Slant Synthetics *4*, 16

CLAERBOUT, Slanted Multiple Reflection Calculation *5*, 1

SCHULTZ, Preliminary p Stacks *5*, 102

SCHULTZ, A Stratified Media Slant Frame *5*, 66

CLAERBOUT, Slant Plane Wave Interpretation Coordinates *7*, 89

CLAERBOUT, Slanted Waves in Slanted Frames (Dispersion) *8*, 17

SCHULTZ, Some Practical Aspects of Slant Wave Stacks *8*, 122

ENGQUIST, Some Numerical Aspects of Stacking *8*, 149

SCHULTZ, Slant Plane Wave Interpretation Coordinates *8*, 180

ESTEVEZ, Slant Stacks and Intervals of Optimum Stacking *11*, 157

CLAYTON, Refracted Body Wave Amplitudes *11*, 173

CLAERBOUT, Overthrust Imaging Coordinates *11*, 195

SOURCE WAVEFORMS

CLAERBOUT, Maximum Entropy Source Waveform Estimation *7*, 167

ESTEVEZ, Shot Waveform Estimation *8*, 202

CLAERBOUT, Refined Source Waveform Estimation *10*, 50

ESTEVEZ, Preliminary Results on Refined Source Waveform Estimation *10*, 55

CANALES, A Note on Waveform Estimation *10*, 69

CLAERBOUT, Source Waveform Ambiguity with Surface Reflection Coefficient *10*, 73

ESTEVEZ and FULP, A Look at Direct Arrivals *11*, 133

FULP, Relating the Direct Arrival to the Shot Waveform *11*, 147

TIME SERIES ANALYSIS

RILEY, Predictive Deconvolution Implies the Earthquake Geometry .. *1*, 296

CLAERBOUT, Maximum Entropy Source Waveform Estimation *7*, 167

CLAERBOUT, Spectral Balancing *7*, 172

KHANNA, Spectral Balancing Example *7*, 183

CLAERBOUT, Exponential Tilt Invariant Solution of Overdetermined Convolution Equations *10*, 84

CLAERBOUT, LEVITY: Levinson Recursion Reprogrammed *10*, 90

CLAERBOUT, Weighted Burg-Levinson Recursion with Noise *11*, 167

CLAERBOUT, Radiative Equilibrium in Acoustic Layered Media *11*, 199

TJØSTHEIM, Autoregressive Modelling and Spectral Estimation for Spatial Data: Some Simultation Experiments *11*, 213

VELOCITY ESTIMATION

DOHERTY, Structure Independent Seismic Velocity Estimation (Dissertation) *4*

SCHULTZ, Velocity Estimation by Wave Front Synthesis (Dissertation) *9*

DOHERTY and CLAERBOUT, Separate Downward Continuation of Shots and Receivers *1*, 136

DOHERTY, Transformations and Migration Equations *1*, 141

DOHERTY and CLAERBOUT, Reconciliation of Various Downward Continuous Equations *1*, 157

DOHERTY and CLAERBOUT, Velocity Analysis Based on the Wave Equation *1*, 160

CLAERBOUT, Some Speculative Ideas on Velocity Estimation *1*, 179

CLAERBOUT, Slant Frames *1*, 279

CLAERBOUT, Imaging with Refraction Seismograms *1*, 283

ESTEVEZ and SCHULTZ, Dispersion Relationship for the Slant Frames Approximation *1*, 287

DOHERTY, Migration as a Tool in Velocity Estimation *2*, 2

DOHERTY, Migration of Common Offset Sections *2*, 8

DOHERTY, Preliminary Results on Downward Continuation of Multi-Offset Sections and Velocity Estimation *2*, 17

SCHULTZ, Modeling Diffractions of the Transmitted Wave (A Discussion) *5*, 43

SCHULTZ, Transmission-Compensated Migration of Vertically Stacked (Plane-Wave) Sections *5*, 51

SCHULTZ, Preliminary Results on Synthesis and Migration of Transmission-Distorted Vertically Stacked Sections *5*, 66

CLAERBOUT, Velocity Estimation Recapitulated *5*, 220

SCHULTZ, A Stratified Media Slant Frame *7*, 66

SCHULTZ, Estimating the Shifting Function *7*, 75

CLAERBOUT, Slant Plane Wave Interpretation Coordinates *7*, 89

CLAERBOUT, Velocity Estimation with Slant Stacks, Part 1 ..... *7*, 94

SCHULTZ, Preliminary p Stacks *7*, 102

CLAERBOUT, Migration in Media with Strong Lateral Velocity Variation *8*, 1

CLAERBOUT, A Brief Derivation of the Dix Theorem *8*, 166

CLAERBOUT, Migration and RMS Velocity *8*, 169

CLAERBOUT, Velocity Independent Downward Continuation *8*, 173

VELOCITY ESTIMATION (continued)

SCHULTZ, Slant Plane Wave Interpretation Coordinates *8*, 180

SCHULTZ, Velocity Estimation in Slant Frames I *8*, 187

CLAERBOUT, How to Measure rms Velocity with a Pencil and a Straight-edge *11*, 41

LYNN, Lateral Velocity Estimation from Unstacked Data *11*, 45

MEHTA, Concurrent Migration and Velocity Estimation in a Random, Non-Gaussian Earth *11*, 61
