Table of Contents SEP-8

Page No.		
	Title Page	
i	Table of Contents	
	Migration Principles	
1	Migration in Media with Strong Lateral Velocity Variation	Jon F. Claerbout
8	Anisotropy Dispersion and Wave Migration Accuracy	Jon F. Claerbout
15	3-D Wave Migration	Jon F. Claerbout
	Approximations in the Differential Equation	
17	Slanted Waves in Slanted Frames	Jon F. Claerbout
38	Expansion About Dipping Waves	Jon F. Claerbout
48	Well-Posedness of One-Way Wave Equations	Bjorn Engquist
	Approximations in the Difference Equations	
62	Frequency Dispersion and Wave Migration Accuracy	Jon F. Claerbout
70	The Effect of Discrete Δx on Wave Migration Accuracy	Walter S. Lynn
96	Difference Approximation of Waves in Slanted Frames	Bjorn Engquist
	Line Integrals Across 2-D Data	
122	Some Practical Aspects of Slant Wave Stacks	Philip S. Schultz
149	Some Numerical Aspects of Stacking	Bjorn Engquist
	Velocity Estimation and Slanted Frames	
166	A Brief Derivation of the Dix Theorem	Jon F. Claerbout
169	Migration and RMS Velocity	Jon F. Claerbout

173	Velocity Independent Downward Continuation	Jon F. Claerbout
180	Slant Plane Wave Interpretation Coordinates	Philip S. Schultz
187	Velocity Estimation in Slant Frames I	Philip S. Schultz
	Shot Waveforms and Multiples	
202	Shot Waveform Estimation	Raul Estevez
222	1-D Examples of Slant Synthetics	Raul Estevez
234	Biographies of New Authors	
235	List of Sponsors
