COMPUTER PHONES

Our computer is connected to the ARPA net and the UNIX-UUCP net (usenet). We can usually receive computer mail via these nets. Our ARPA net address is hanauma (i.e., send Jon mail with the address jon@hanauma); your 'host table' should have the entry

```
36.51.0.16 hanauma su-hanauma
```

If you are on the UNIX-UUCP net, our address is "decvax!hanauma". Our 300/1200/2400 baud phone number is (415) 725-1335. Telephone Joe Dellinger ((415) 723-0463) if you want information on how to send us mail via Bitnet or Csnet.

MAP

A Stanford University map is on page 368.

Weird code, part 5

No, not all C code looks this weird. Remember, *real* wizards, of course, can decipher this at a glance...

5. The grand prize (most well-rounded in confusion):
(submitted by Carl Shapiro <sdcrdcf!otto!carl>)

```
#define P(X)j=write(1,X,1)
#define C 39
int M[5000]={2},*u=M,N[5000],R=22,a[4],l[]={0,-1,C-1,-1},m[]={1,-C,-1,C},*b=N,
*d=N,c,e,f,g,i,j,k,s;main(){for(M[i=C*R-1]=24;f|d>=b;){c=M[g=i];i=e;for(s=f=0;
s<4;s++)if((k=m[s]+g)>=0&&k<C*R&&l[s]!=k%C&&(!M[k]||!j&&c>=16!=M[k]>=16))
a[f++]=s;if(f){f=M[e=m[s=a[rand()/(1+2147483647/f)]]+g];j=j<f?f:j;f+=c&-16*!j;
M[g]=c|l<<s;M[*d++=e]=f|l<<(s+2)%4;}else e=d>b++?b[-1]:e;}P(" ");for(s=C;--s;
P("_"))P(" ");for(;P("\n"),R--;P("|"))for(e=C;e--;P("_ "+(*u++/8)%2))
P("| "+(*u/4)%2);}
```

[As submitted, this program was 3 lines (2 of defines and 1 of code).
To make news/mail/etc. happy we split the last line into 7. Join them
back without the newlines to get the original version]

RESEARCH PERSONNEL

Kamal Al-Yahya received a B.S. degree in physics from University of Petroleum & Minerals, (Dhahran), 1980, and an M.S. degree in engineering geoscience from University of California, Berkeley in 1983. He is currently a Ph.D. candidate in geophysics at Stanford. He is a member of the SEG and EAEG and a recipient of an ARAMCO scholarship.

Biondo L. Biondi received his B.S. degree in electrical engineering in 1984 from the Polytechnical School of Milano. His bachelor thesis was about seismic signal processing and was developed in cooperation with the I.B.M. Research Center in Rome. In March 1985 he joined the SEP and is currently working toward his Ph.D. in geophysics at Stanford. He is a student member of SEG and EAEG.

Jon F. Claerbout (M.I.T., B.S. physics, 1960, M.S. geophysics, 1963, Ph.D. geophysics, 1967) joined the geophysics faculty at Stanford University in 1967 and became a consultant to the Chevron Oil Field Research Company (1967-73). On leave in 1972-73, he was a visiting research geologist at Princeton University and a visiting lecturer at Sydney University. In 1973 he founded the Stanford Exploration Project (SEP). In 1977 he was elected a Fellow of the American Geophysical Union and in 1979 joined the MIT Corporation Advisory Committee to Earth Sciences. Professor Claerbout received the Best Presentation Award from the Society of Exploration Geophysicists for his paper, *Extrapolation of Wave Fields*, and received the Society's Medal Award "in recognition of his outstanding and original pioneering work in seismic wave analysis." His first textbook *Fundamentals of Geophysical Data Processing*, published in 1976, was translated to Chinese (1979) and Russian (1981). During a 1979-80 sabbatical at Cambridge University he wrote a second book *Imaging the Earth's Interior*. In 1985 he became an honorary member of the SEG.

John Etgen received a B.S. in Geophysical Engineering from Colorado School of Mines in May 1985. During the summer of 1985 he worked as a geophysicist for Amoco Production Company in Denver. He joined SEP in September of 1985 and is currently working toward a Ph.D. in geophysics.

Joe Dellinger received a B.S. degree in mathematics and another in geophysics from Texas A & M university in 1983, under Mobil and Amoco scholarships. After spending a summer working for Mobil DRD, he is now working toward a Ph.D. in geophysics at Stanford as a member of the SEP group under an NSF scholarship.

Paul Fowler received a B.S. in mathematics and geology from Portland State University in 1981 and an M.S. in geophysics from Stanford in 1984. He has worked as a seismologist for the U.S. Army Corps of Engineers during 1982, and as a research geophysicist with Merlin Profilers in Woking, England during the summer of 1984. He joined SEP in 1982 and is currently working toward a Ph.D. in geophysics. He is a student member of SEG, EAEG, AGU, and SSA, and has been the recipient of an NSF graduate fellowship.

William Harlan received a B.S. in geophysics from Texas A & M University in 1981 under a scholarship from the SEG, an M.S. in geophysics from Stanford in 1984, and a Ph.D in geophysics from Stanford in 1986. During the summer of 1980, he worked as a seismic interpreter for Conoco in Midland, Texas. After receiving his B.S. degree, he worked as a Conoco researcher in Ponca City. In 1981 he joined the SEP as a Ph.D. candidate at Stanford. During the first half of 1984, Bill studied at L'Institut Français du Pétrole with Patrick Lailly. His doctoral research at Stanford emphasized the application of estimation theory to the extraction of rock parameters from sparse and noisy data. Bill is now a Research Scientist at Qing Hua University in Beijing.

Clement Kostov graduated from the Ecole des Mines de Paris in 1983, then received an M.S. in Geostatistics from Stanford University and joined the SEP in July 1985. He speaks French, German and Bulgarian and has had summer jobs with Elf-Aquitaine in France and Sohio P.C. in San Francisco.

Stewart A. Levin received a B.A. in Mathematics from Princeton in 1975 and an M.S. in Mathematics in 1978 from Stanford. From 1979-1982 he worked at Western Geophysical, Houston, as a Senior Research Geophysicist. He joined the SEP in September 1982.

Zhiming Li received a B.S. in geophysics from the East-China Petroleum Institute in 1982 and a M.S. in geophysics from Stanford University in 1984. From January to April of 1982, he was doing his bachelor thesis of Maximum Entropy Deconvolution and other research at the Shengli Oilfield, the second largest oilfield in China. He is now working toward a Ph.D. in Geophysics.

Peter Mora received a B.Sc. in geophysics (1978) and a B.Sc. Honours degree (1979) from the University of Adelaide, Australia. His honours thesis involved 2D ray tracing to study moveout functions and interval velocities. He worked for Esso Australia as a geophysicist and programmer and later consulted to Delhi Petroleum developing forward modeling software including ray tracing and finite difference schemes. In September 1982 he started a Ph.D. in geophysics at Stanford. From February to September 1985 he worked as a researcher at l'Institut de Physique du Globe in Paris. He is currently at Stanford working toward a Ph.D. on elastic inversion.

Francis Muir studied mathematics at Balliol College, Oxford, from 1943 to 1950. In 1954 he joined Seismograph Service Limited where he was employed in research and as a field geophysicist on reflection and refraction crews in the U.K., Algeria, Niger, Nigeria, Papua and Australia. He joined West Australian Petroleum in 1962 as a field supervisor and staff geophysicist, and transferred to Chevron Oil Field Research Company in 1967, where he was senior research associate at the time of his leaving Chevron at the end of 1983. Francis was a consulting professor at Stanford for two quarters in 1978, a further quarter in 1981, and was reappointed to that position in January of 1984. Since July 1984 he has continued the appointment on a part-time basis and, additionally, presides over Francis Muir & Company, which is involved in seismic exploration and software development.

Rick Ottolini is currently a part-time post-doc at SEP and consultant in computer science and geophysics. He received a Ph.D. from Stanford in 1983 with the thesis "Migration in Midpoint-Angle Coordinates" (SEP-33). He is interested in seismic imaging and data interpretation aids. His principal interest is bringing frontier hardware and software computing to SEP (super-computing, graphics, networks, user-interfaces, A.I.).

Joshua (Shuki) Ronen received a B.Sc. in physics and geology from the Hebrew University at Jerusalem in 1981, and a Ph.D. in geophysics in 1985 from Stanford University. He is currently working at Saxpy Computer Company.

Chuck Sword received a B.S. in physics from Stanford University in 1980. That summer he worked at Marathon Oil Company's Denver Research Center. He joined the SEP in September 1980. During the summer of 1982 he worked at Chevron Research in La Habra. In 1983 he received a M.S. degree in geophysics from Stanford. For nine months in 1983-84 he studied at the Gubkin Institute of Petrochemical and Gas Industry in Moscow. Chuck is currently working towards his Ph.D. in geophysics; he is studying the determination of interval velocities by tomographic methods. He is a member of SEG, EAEG, and AGU.

Jos van Trier received his B.S. in physics in 1982 and his M.S. in geophysics in 1985 from the University of Utrecht, the Netherlands. He joined the SEP in September 1985 and is currently working toward a Ph.D. in geophysics at Stanford.

Marta Jo Woodward received a B.A. in chemistry from the University of California at San Diego in 1974 and an M.B.A. from the University of Santa Clara in 1981. From 1978 through 1982 she worked for the U.S. Geological Survey in Menlo Park. Marta joined the SEP in September 1983 and is currently working toward a Ph.D. in geophysics. During the summer of 1984 she worked for Chevron U.S.A. in Concord CA.
