SEP-59 — TABLE OF CONTENTS

Novel Seismic Sources

Claerbout, J.F., Cole, S., Nichols, D., and Zhang, L., Why a big 2-D array to record microseisms? 1

Kostov, C., Drill-bit signal 11

Cole, S., Phase-shift migration of passive seismic data 35

Anisotropy

Dellinger, J., Wavefield separation in anisotropic media (and why it's not what you expect) 55

Nichols, D., and Ottolini, R., Symbolic manipulation of layered media 73

Inversion

Zhang, L., Dellinger, J., and Muir, F., Unique solutions for l_1 problems 87

Serakiotou, N., Sensitivity of acoustic data to the geometry of the earth model .. 97

Velocity Estimation

Biondi, B., Interval velocity estimation from beam-stacked data — 2-D gradient operator 103

Etgen, J., Prestack depth migration velocity analysis: linear theory revised 121

Van Trier, J., Velocity analysis of migrated seismic data after structural interpretation 141

Sword, C., Interval velocity analysis using $s - g$ downward-continued data 151

Tomography

Woodward, M.J., Wavepaths in inhomogeneous media 163

Stork, C., A non-linear velocity inversion of a moderately difficult synthetic model in a cross-hole geometry using ray trace tomography 169

Migration and Stacking

Zhang, L., A new Jacobian for dip-moveout 201
Ottolini, R., Sign-count stacking velocity analysis, slant stacks, and beam stacks 209

Computer Graphics

Dulac, J.C., Nichols, D., Van Trier, J.,, An introduction to InterViews 217
Dulac, J.C., A user interface manager: SepView 223
Van Trier, J., An interactive interface for velocity optimization using geological constraints 241
Ottolini, R., Movies on the Macintosh II 255
Ottolini, R., Proposal for an earth science computing project at Stanford 269

Tutorials

Ottolini, R., Gallery of the double-square-root equation 281
Claerbout, J.F., A scrutiny of the introduction 287
