This is a tiny file, sample.tex

I will convert this file to postscript.

texpr -s -d sample.tex

dvips -q -o sample.ps sample.dvi

You can also make .ps files from .v files. You can extract pages from books and sep reports with ghostview sample.ps

If you are viewing the files in this directory thru the WWW with mosaic or netscape, you can click on all these files to see what happens. Maybe I will copy each of them to each of your directories. Maybe I won't.

Home directory /homes/sep/NAME /homes/oldsep/NAME web public page /sepwww/pub/sep/NAME /sepwww/pub/sep/NAME

I suggest SEP students make the following symbolic link: ln -s /sepwww/pub/sep/YOURNAME /pub

I suggest SEP alums make the following symbolic link: ln -s /sepwww/pub/oldsep/YOURNAME /pub
